**Strengths**

- Sound average returns on assets and in equity,
- Below sector averages non-performing loans ratio and higher provisioning contributed to the assets quality,
- Sustainable profit generation capacity through resilient income components,
- Substantial growth performance in terms of assets size base, well over the Turkish banking sector average for the last five year period,
- Solid and broad customer deposit base along with a maturity profile of collected funds well above the sector average,
- Sturdiness of the Turkish banking system in general and good operational environment,
- Retention profit policy contributing to the capital adequacy level,
- Efforts to diversify funding sources such as subordinated loans through overseas Sukuk financial markets,
- High level of compliance with corporate governance best practices.

**Constraints**

- Continuous diminution in total income coverage of total expenses,
- Upcoming entry into the interest free banking segment of two state-owned banks to exert pressure on the profitability levels and growth in loans, assets and deposit due to further competition,
- Remarkable increase in activity expenses,
- Limited products and fund resources convenient to the principle Islamic Sharia,
- Significant increase in foreign currency risk exposure-long, in particular in USD, and no utilization of derivatives instrument for risk hedging.
