Strengths

- Appropriateness level of assets in the receivable pool in terms of their low level of default probability
- High immunity and liquidity level of portfolio structure attained through effective matching terms and few conditionalities
- Concentration risk lowered to minimum via homogeneous and multitudinous profile of obligors in the receivable pool
- Perfect track record and redemption performance of the past 13 issues of ABSs since October, 2011
- Regulatory requirement of 5% risk retention mechanism serving as an additional support component for the ABS investors
- Facility to be provided by the originator to replace the prepaid loans with identical ones abating prepayment risks
- Possible collection risk arising from the decease of the borrowers to be covered by life insurance policies

Constraints

- Expanding swell of volatility in fixed income securities and benchmark interest rates through persisting unpredictability in national and global market dynamics
- The securities to be issued still lacking ubiquity in Turkish financial markets albeit being the 14th consecutive issue of identical structure
- Symmetrical risk profiles impeding investor diversity regarding absence of tranches and waterfall structures
