Overview

"Fibabanka A.Ş. Üçüncü Varlık Finansmanı Fonu" (hereinafter referred to as 'Asset Finance Fund', 'the Fund' or 'SPV') was established for an infinite term by Fibabanka A.Ş. (Fibabanka) to issue asset-backed securities.

Approved asset amount of the Fund is up to TRY 15bn and its originator is Fibabanka A.Ş., realizing asset-backed securities based on a receivable pool consisting of receivables from cheque collateralised discounted loans that Fibabanka has extended to its commercial customers. Having entered as a player to Turkish finance industry as a subsidiary of Fiba Group on December 27, 2010; Fibabanka A.Ş. (hereinafter referred to as "Fibabanka" or "the Bank") offers products, services and applications in the domains of its core operations, including corporate, commercial, SME, agricultural, retail and private banking. The Bank had total asset sizes of TRY 103,558mn and TRY 74,002mn in FYE2023 and FYE2022, respectively.

Planned to be issued in 3 separate maturity tranches by a pay-through mechanism, ABSs (asset-backed securities) will be sold on the nominal values to local qualified investors by invitation without any public offering. The similar financial profile of the borrowers who use discount loans, which is constituting the majority of the receivable pool to be transferred, by providing cheques in the receivables pool as collateral, the low portfolio risk and expected losses of these assets, the ease of liquidity provided by the collection of the relevant amount from the borrowers in case the cheques are not collected, and thus the increased capacity to repay the obligations arising from the issuance of these ABSs are the main factors that increase investor confidence. The instalment commercial loans portfolio indicates low portfolio risk considering the pool of receivables with a maximum of 9 months to maturity, a commercial credit rating above 399, at least one instalment paid and no delay. The receivable pool is constituted of cheque collateralised discounted loans and instalment commercial loans within 63 cities in Türkiye.

JCR Eurasia Rating maintains its opinion that space created for "Fibabanka A.Ş. Üçüncü Varlık Finansmanı Fonu" and its technical equipment, as well as risk management and internal control system procedures, the constitution of a system for the safeguarding of accounting, records, and documentation and the possession of a statistical data base will function efficiently.

Strengths

- Numerous defined asset eligibility requirements strengthening the appropriateness level of assets in the receivable pool,
- Well track record and redemption performance of the receivable pool,
- Appropriateness level of assets in the receivable pool in terms of their low level of default probability and the ability of recovery of uncollected receivables from the credit accounts of the borrowers,
- Regulatory requirement of a 5% risk retention mechanism as an additional support component for the ABS investors,
- Current local regulations in Türkiye affording asset isolation and remoteness of bankruptcy,
- A liquid portfolio structure guaranteed by matching terms for receivables,
- Multitudinous profile of obligors in the receivable pool despite sectoral and geographical concentration risk to a certain extent.

Constraints

- Absence of established insurance mechanism,
- Receivable pool remaining below the nominal amount of ABS and absence of cheque collateral for a part of the receivable pool,
- Similar risk profiles across the tranches despite the presence of a waterfall structure for the senior tranche,
- Possible exposure to interest rate mismatch due to the structure of ABS issues,
- Detailed risk assessments of the submitted documentation outside the scope of the rating process,
- Detailed risk assessments of the originator outside the scope of the rating process,
- Leading economic indicators signal global economic slowdown whereas quantitative tightening actions aim to restrict consumption growth and achieve a soft-landing in the domestic side.
