Strengths

- Healthy sales revenue generation capacity in FY2025 and expected to continue in 2026 financials,
- Positive cash flow metrics in FY2025,
- Considerable share of export sales among net sales and geographical diversification of exports,
- High equity level mainly supported by accumulated profit, despite low level of paid-in capital,
- Manageable customer concentration risk supporting asset quality,
- Cost advantage gained through economies of scale and new product creation capability, mainly in chemicals, thanks to completed and ongoing investments,
- Promising long-term trend in domestic furniture demand,
- Long-lasting presence in the sector and accumulated know-how.

Constraints

- Short-term weighted debt structure pressuring liquidity indicators in the analyzed periods,
- High level of net debt to EBITDA multiplier and low level of interest coverage ratio, despite slight recovery in FY2025,
- Financing expenses pressuring bottom-line results, despite offsetting through IAS 29 in FY2025,
- Exposure to short FX position in the analyzed period and 1H2026, despite partially mitigated through export revenues,
- As actions for a global soft-landing gain prominence, geopolitical risks and decisions with the potential to adversely affect global trade are engendering considerable uncertainty.

Considering the aforementioned points, the Company's Long-Term National Issuer Credit Rating has been affirmed at 'BBB+ (tr)'. The Company's healthy sales revenue, positive cash flow metrics, high equity level and low collection risk as well as high level of net debt to EBITDA multiplier, short FX position and uncertainties in the global economy have been evaluated as important indicators for the stability of the ratings and the outlooks for Long and Short-Term National Issuer Credit Ratings are determined as 'Stable'. The Company's financial structure, sales and profitability performance, liquidity and leverage indicators will be closely monitored by JCR Eurasia Rating in the upcoming periods.
