Overview

"Türkiye Menkul Kıymetleştirme Şirketi Fibabanka Birinci Varlık Finansmanı Fonu" (hereinafter referred to as 'Asset Finance Fund', 'the Fund' or 'SPV') was established for an infinite term by Türkiye Menkul Kıymetleştirme Şirketi (TMKS) to issue asset-backed securities.

Approved asset amount of the Fund is up to TRY 15.00bn and its originator is Fibabanka A.Ş., realizing asset-backed securities based on a receivable pool consisting of receivables in instalments of general consumer loans which Fibabanka A.Ş. extended to customers. Having entered as a player to Turkish finance industry as a subsidiary of Fiba Group on December 27, 2010; Fibabanka A.Ş. (hereinafter referred to as "Fibabanka" or "the Bank") offers products, services and applications in the domains of its core operations, including corporate, commercial, SME, agricultural, retail and private banking. The Bank had total asset size of TRY 144.68bn and TRY 129.59bn as of 1Q2025 and FYE2024, respectively.

Planned to be issued in 4 separate maturity tranches by a pay-through mechanism, ABSs (asset-backed securities) will be sold on the nominal values to local qualified investors by invitation without any public offering. The essential elements to inspire investor confidence are the similar financial profile of obligors of assets in the receivable pool, low portfolio risk and expected losses of these assets, expected-to-increase liquidity facility to be attained through high ending cash balances of loan repayments by obligors to cover disbursements to ABS investors, and hence increased capacity to repay obligations arising from this ABS issue.

JCR Eurasia Rating maintains its opinion that space created for "Türkiye Menkul Kıymetleştirme Şirketi Fibabanka Birinci Varlık Finansmanı Fonu" and its technical equipment, as well as risk management and internal control system procedures, the constitution of a system for the safeguarding of accounting, records, and documentation and the possession of a statistical data base will function efficiently.

Strengths

- Numerous defined asset eligibility requirements strengthening the appropriateness level of assets in the receivable pool,
- Well track record and redemption performance of the consumer loans in the receivable pool,
- Appropriateness level of assets in the receivable pool in terms of their low level of default probability and the ability of recovery of uncollected receivables from the credit accounts of the borrowers,
- Regulatory requirement of 5% risk retention mechanism as an additional support component for the ABS investors,
- Current local regulations in Türkiye affording asset isolation and remoteness of bankruptcy,
- A liquid portfolio structure guaranteed by matching terms and few conditionalities for receivables,
- Multitudinous profile of obligors in the receivable pool despite sectoral and geographical concentration risk to a certain extent.

Constraints

- Absence of established insurance mechanism,
- Receivable pool remaining slightly below the nominal amount of ABS and absence of cheque collateral for 43% of the receivable pool,
- Similar risk profiles across the tranches despite presence of waterfall structure for senior tranche,
- Possible exposure to interest rate mismatch due to the structure of ABS issues,
- Detailed risk assessments of the submitted documentation outside the scope of our analyses,
- Detailed risk assessments of the originator outside the scope of our analyses,
- As actions for a global soft-landing gain prominence, decisions with the potential to adversely affect global trade are engendering considerable uncertainty.
